

Canadian Peony Society 2021 Seed List [Harvest 2020]

Hello Peony Friends,

My name is John Moons. This is the fourth year that I am co-ordinating the Seed Exchange for the Canadian Peony Society.

This year I received seed from 10 donors and we would like to thank them. I also received seeds from Michael Turunen in Finland who has been a regular donor. The rest of the seeds came from Canadian sources. Twenty minutes south of Brantford ON. is a privately-owned botanical garden called Whistling Gardens. The owners, Darren and Wanda Heimbecker, have the biggest peony collection in North America with more than 1,200 varieties. The Heimbeckers were again kind enough to let me harvest their peony seeds. I spent 13 afternoons collecting thousands of seeds from more than 260 different peonies. We also have to say a big THANK YOU to Bill Wegman. He sent me the seeds of 67 different peonies and a good number of them are the very popular seeds of the crossings. Thank you Bill!

The conditions here in Ontario were not ideal for the setting of the seeds because of the very cold spring. We had snow on the day after Mother's Day! In parts of Ontario it was also very dry and some growers cut off the seed pods to save the plants. In spite of that, we collected more seeds than ever, with more than 21,000 seeds of 369 different peonies.

How many seeds I put in each packet depends on how many seeds were collected from that particular peony. We have a few with only one or two seeds, but I also have some peonies with more than 600 seeds.

Ordering

You may email your list to John Moons at moons.campbell@gmail.com or send your list (please write both the item number and the name) of requested seeds to:

Canadian Peony Society Seeds c/o John Moons
34 Langford Church Road
Brantford, ON N3T 5L4

Please list a few alternatives for each choice. If you would like instructions on germinating peony seed, please ask. You may certainly order more than one packet. For the first month of the listing I will limit orders to a maximum of 3 packets of seed from each individual peony. Non-members of the Canadian Peony Society may order from the list, but where quantities are scarce, members' orders will have priority. Remember to include your mailing address with your order, or a mailing label if you have one.

We will send you a message to confirm the price for your order. There are three ways to pay.

- e-transfer your payment from your bank account to treasurer@peony.ca. No password is required.
- mail a cheque or money order (in Canadian funds) payable to the Canadian Peony Society to the address above. Do not send cash through the mail.
- pay with PayPal from the Seed Exchange page of the CPS web site.

The price is the same as last year. If you compare the price of the seeds of our peonies with seeds of other plants (Cannabis!), then I believe the price is very reasonable. And a peony plant can last you a life time! Cost is \$3.00 per packet plus a shipping charge of \$2.00 for every 5 packets shipped out.

For example: 5 packets : \$15.00 + \$2.00 = \$17.00, 6 packets: \$18.00 + \$4.00 = \$22.00,
10 packets: \$30.00 + \$4.00 = \$34.00, 11 packets: \$33.00 + \$6.00 = \$39.00.

Everything is in Canadian funds.

If you need peony seed for your peony group or garden club, contact me to make special arrangements.

We thank our donors:	AMW	Adriana and Marvin Work	Beasley, BC
	AY	Adam Yakabuskie	Calgary, AB
	BSh	Beverly Sheridan	Calgary, AB
	BW	Bill Wegman	Manotick, ON
	HG	Tom Harris, Dennis Gerhardt	Warkworth, ON
	HP-L	Holly Pender-Love	Trail, BC
	JCJM	Joan Campbell, John Moons	Brantford, ON
	LJH	Linda and Joe Harvey	Victoria, BC
	MTu	Michael Turunen	Lepsämä, Finland
	WhG	Whistling Gardens	Wilsonville, ON

Important notes - Unless you have the seeds of man-made crosses (#3, 345, 352 and 310 -317) the seeds are the results of open pollination (O/P). We do not know where the insects took the pollen from.

The name you see on the list is the name of the mother plant; the father is unknown. The plants and flowers that grow out of these seeds can have any colour, shape or size, even if they come from the same pod. They might not look like the mother plant at all.

The seeds of peonies have a double dormancy. Dormancy is a condition in which the seed will not germinate. Before anything the seed has to be exposed to moisture and then first go through a period of warm temperatures (summer) and then after that, the seed has to be exposed to a period of cold temperatures (winter). Do not change the sequence. Do not let the seeds dry out in this whole process. All this can also be done indoors. This process is called a double stratification. When the seeds do not come up in the first Spring after you have planted them, leave everything in the ground and they have a very good chance that they will come up a year later or even two or three years later. Make sure that you keep the seeds damp all that time and keep an eye out for rodents, birds and insects. Mark the location. Have lots of patience.

Herbaceous Species – All are garden origin, open pollinated (O/P) unless otherwise stated, packet contents as indicated, *means there is only a limited supply available, *** means there is only one seed. C means the mother plant is a Canadian hybridized peony.

Tree or woody peonies

Important notes

Tree peonies more than herbaceous, need usually TWO (2) periods of warm and cool temperatures to germinate. An example is as follows: seeds planted: May 2021, summer 2021, winter 2021/2022, summer 2022, winter 2022/2023, spring 2023 the seeds come up. Some seeds will come up in the spring of 2022, but do not count on it. Most seeds will come up in the spring of 2023, but some will come up in 2024 or even 2025. Keep the seeds damp all that time! Keep an eye out for rodents, birds and insects. One lady who purchased our seeds had peonies coming up all over the garden after her chickens found her seedbed. Tree peonies will test your garden patience, but the rewards are great! All the seeds are of garden origin, open pollinated (O/P) unless otherwise stated, packet contents as indicated, * means that there is only a very limited supply available, *** means there is only one seed.
