

## Canadian Peony Society 2023 Seed List [Harvest 2022]

Hello Peony Friends,

My name is John Moons. This is the sixth year that I am co-ordinating the Seed Exchange for the Canadian Peony Society.

This year we received seed from 8 donors and we would like to thank them. Twenty minutes south of Brantford ON. is a privately-owned botanical garden called Whistling Gardens. The owners, Darren and Wanda Heimbecker, have the biggest peony collection in North America with more than 1,200 different peonies. The Heimbeckers were again kind enough to let me harvest their peony seeds. I spent 12 afternoons collecting thousands of seeds from more than 225 different peonies. I did not think that it was a hardship. The weather is usually nice and I get to see thousands of different conifers. We also have to say a big THANK YOU to Bill Wegman. He sent me the seeds of more than 60 different peonies and a good number of them are the very popular seeds of the crossings. Thank you Bill! Our American friend Gregory Rockwell sent me more than 1400 seeds of mostly woody peonies. He even sent 60 seeds of Lutea Hybrid Woody Peony crosses. He has it very well organized and he even gave me the number of all the seeds he sent me. Thank you very much Gregory!

Here in Ontario we noticed that the setting of seeds was very modest. A lot of peonies that gave us a lot of seeds in the past, had a very limited number of seeds in 2022. We do not know the reason. The weather at the time that the peonies were in bloom, was good, but it almost looked like we had not as many insects as in other years. Here in Brantford we noticed that in the evening when we enjoyed a glass of sherry on our deck, there were less insects than in other years and it was very quiet in the evening all summer long. There were only a few tree swallows in our 12 birdhouses and the birds left early.

This year we can offer you more than 15,700 of more than 350 different peonies. Last we had more than 27,000 seeds of more than 400 peonies. We passed an important milestone: since I started to work with the Seed Exchange we have made more than 100,000 seeds available (that was a lot of counting!).

### Ordering

The number of seeds in each packet depends on how many seeds that particular peony were collected. This year we have a few with only one or two seeds, but there are also have some peonies with more than 700 seeds.

You may email your list to John Moons at [moons.campbell@gmail.com](mailto:moons.campbell@gmail.com) or send your list (please write both the item number and the name) of requested seeds to:  
Canadian Peony Society c/o John Moons  
34 Langford Church Road  
Brantford, ON N3T 5L4 Canada

Please list a few alternatives for each choice. You may certainly order more than one packet. For the first month of the listing I will limit orders to a maximum of 3 packets of seed from each individual peony. Non-members of the Canadian Peony Society may order from the list, but where quantities are scarce, members' orders will have priority. Remember to include your mailing address with your order, or a mailing label if you have one.

We will send you a message to confirm the price for your order. There are three ways to pay.

- e-transfer your payment from your bank account to [treasurer@peony.ca](mailto:treasurer@peony.ca). No password is required.
- mail a cheque or money order (in Canadian funds) payable to the Canadian Peony Society to the address above. Do not send cash through the mail.
- pay with PayPal or major credit card using the web link we will send you when we confirm your order.

The price is the same as last year. If you compare the price of the seeds of our peonies with seeds of other plants (Cannabis!), then I believe the price is very reasonable. And a peony plant can last you a life time! Cost is \$3.00 per packet plus a shipping charge of \$2.00 for every 5 packets shipped out.

For example: 5 packets: \$15.00 + \$2.00 = \$17.00, 6 packets: \$18.00 + \$4.00 = \$22.00,

10 packets: \$30.00 + \$4.00 = \$34.00, 11 packets: \$33.00 + \$6.00 = \$39.00.

If you want to be able to track the travel of your order, the cost for the tracking is on top of the regular charges.

Everything is in Canadian funds.

If you need peony seed for your peony group or garden club, contact me to make special arrangements.

**We thank our donors:**

**Important notes** - Unless you have the seeds of man-made crosses (# 262-270 and 348-353) the seeds are the results of open pollination (O/P). We do not know where the insects took the pollen from.

- The name you see on the list is the name of the pod (mother) plant; the father is unknown. The plants and flowers that grow out of these seeds can have any colour, shape or size, even if they come from the same pod. They might not look like the mother plant at all.
- The seeds of peonies have a double dormancy before they grow leaves. Dormancy is a condition in which the seed will not germinate. Before anything the seed has to be exposed to moisture and then first go through a period of warm temperatures (summer) and then after that, the seed has to be exposed to a period of cold temperatures (winter). Do not change the sequence. Do not let the seeds dry out in this whole process. This process is called a double stratification. You can start the seeds indoors, but you need space in a fridge for a few months.
- When the seeds do not come up in the first spring after you have planted them, leave everything in the ground and they have a very good chance that they will come up a year later or even two or three years later. Make sure that you keep the soil where you put the seeds, damp all that time and keep an eye out for rodents, birds and insects. Mark the location. Have lots of patience.
- The names you see on the list are the names that I took from the labels near the plants or the names that people gave me. I tried to find the correct spelling, but sometimes it is very hard to find the right information.

## 2023 seed list

### **Woody (Tree) Peonies**

#### **Important notes**

Woody peonies more than herbaceous peonies, need usually TWO (2) periods of warm and cool temperatures to germinate. An example is as follows: seeds planted May-June 2022, summer 2022, winter 2022/2023, summer 2023, winter 2023/2024, spring 2024 the seeds will come up. Some of the seeds will come up in the spring of 2023, but do not count on it. Most of the seeds will come up in the spring of 2024, but some will come up in 2025 or 2026 or even later. Keep the seeds moist all that time! Keep an eye out for rodents, birds and insects. One lady who purchased our seeds, had peonies coming up all over the garden after her chickens found her seedbed. Woody peonies test your garden patience, but the rewards are great!

All the seeds are of garden origin, open pollinated unless otherwise stated. The packet content is as indicated, \* means there is only a very limited number of seeds available and \*\*\* means that we have only one seed.
